## DETAILED ACTION

### *Response to Arguments*

1. Applicant's arguments with respect to claims **1-3, 8-12, 14, 17-32 and 36-59** have been considered but are moot in view of the new ground(s) of rejection.

### *Claim Rejections - 35 USC § 103*

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
  2. Ascertaining the differences between the prior art and the claims at issue.
  3. Resolving the level of ordinary skill in the pertinent art.
  4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
4. Claims **1-3, 11 and 39-45** are rejected under 35 U.S.C. 103(a) as being unpatentable over DiGiacomo (US 6,085,831) in view of Anderson (US 5,761,037).
  5. As to claims **1 and 39-43 and 45**, DiGiacomo substantially discloses the invention as claimed, but does not disclose an evaporator that is substantially full of liquid coolant at all orientations. Anderson discloses an orientation independent evaporator that does provide an evaporator that is substantially full of liquid coolant at all orientations (see column 4 lines 30-40). Therefore it would have been obvious to one of ordinary skill in the art at the time the

invention was made to modify DiGiacomo to provide an evaporator that is substantially full of liquid coolant at all orientations as taught by Anderson to more efficiently cool electronic circuit chips and devices so that they maybe operated at higher speeds.

6. **As to claim 2**, DiGiacomo teaches an apparatus wherein the cooling means comprises cooling fins **53 (see figure 1)**.

7. **As to claim 3**, DiGiacomo teaches an apparatus wherein the cooling fins extend from the condenser **(see figure 1)**.

8. **As to claim 11**, DiGiacomo substantially discloses the invention as claimed, but does not disclose a boiling enhancement structure that comprises open-celled porous foam. Anderson discloses a boiling enhancement structure that comprises open-celled porous foam **(see column 4 lines 5-10)**. Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to modify DiGiacomo's invention by providing a boiling enhancement structure that comprises open-celled porous foam as taught by Anderson in order minimize the resistance to a capillary flow and to allow the wick to actively participate in the evaporation process.

9. **As to claim 44**, DiGiacomo teaches a step of providing a void in the evaporator to allow the coolant to directly contact the heat-dissipating element **(see column 6 lines 20-40)**.

*Allowable Subject Matter*

10. Claims **8-10 and 12-38** are allowed.

11. Claim **46** is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Election/Restrictions***

12. Claims 4-6 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected species, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on September 23<sup>rd</sup>, 2002.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
